Subject: LRP-2018-730 UNT 8 status

Importance: High

Hi Alyssa,

I know that we just sent it to you last Wednesday, but do you know when you will have a determination on whether UNT 8 can come off of the mitigation for LRP-2018-730 (Benedum)? We just received edits to the EA from the FAA and we need to finalize the type of mitigation that the airport plans to do before we can resubmit and we are HOPING this is our last submittal to them. If UNT 8 stays on the mitigation plan, they are going to do PRM. If UNT 8 does NOT have to be mitigated for, I believe that they will do In-Lieu.

Thanks,

[Nonresponsive based on revised scope]
